Visual Art

TERM 2

LEVEL 1 – FOUNDATION

In level 1, students will experiment with different types of recycled materials - cutting, ripping, twisting etc. They will explore different ways to attach the material, while constructing a group artwork. Students will then work with a variety of drawing media, using marks and lines to create their wonderful mini beast art works.

LEVEL 2 – GRADES 1-2

In level 2, students will develop their idea of pattern using a variety of printing methods, to create their ‘waste munching’ mini-beasts. Students will then explore different recycled materials, building and changing them by cutting, shaping and decorating before constructing a variety of habitats.

LEVEL 3- GRADES 3-4

In level 3, students will reuse recycled materials in a variety of ways to construct jewellery, frames and other objects. They will experiment with different joining methods to improve strength and support their art work. Students will then explore the decorative quality of line, using lines to build backgrounds with a variety of drawing media.

LEVEL 4- GRADES 5-6

In level 4, students will look at different ways recycled materials have been used by different artists. They will experiment with recycled materials and then work in small groups to construct their own pieces of art. Students will then discuss ‘Waste’ in their lives, before creating a collage reflecting on their ideas on reducing waste, using a variety of materials and special effects.
